LYMPHATIC DRAINAGE WITH THE ST8

ELF LABS' NEWEST TECHNOLOGY NOW AVAILABLE IN ARNOLD, MARYLAND

“Listening is an acquired skill. Few people are virtuosos at listening.”

We now offer an upgraded, greatly improved form of lymphatic drainage using a system called the ST-8.

The ST-8 is the world's first oxygen-fed Scalar Transmitter Tissue Detoxification System. Non-invasive and non-cytotoxic, the ST8 helps detoxify tissue by assisting the body in dissolving lymph blockages and restoring normal lymph flow using novel quantum scalar technology coupled with super-oxygenated oxygen for remarkable healing effects.

The following information is a bit technical but I include it here for those who need more detailed information.

The ST8 is an upgraded, more effective version of the Light Beam Generator (LBG) which we previously employed. The model we have is a four header: two ST8s and two LBGs.

Before we treat anyone on the ST8, we conduct an interview, make sure the patients are on adequate drainage remedies, hydrated and having regular bowel movements. We then muscle test to see how long the person needs to be on it and at what intensity the person is ready for. Some chemically sensitive patients may have to start off with a five-minute treatment but most people can start off with a half hour or more.

Our patients really like the ST8 and feel immediate improvements.

The ST8 technology represents a “quantum leap” in expediting critical lymph stasis. It significantly reduces the potential for healing crisis by placing the super-oxygenated oxygen molecule directly at the lymph stasis target site without the risk of creating damaging free radicals in the body. The ST8 is an effective technology for overcoming critical-care lymph stasis...and it avoids the pitfalls of high voltage gas-ionization, as high voltage gas-ionizing units produce non-penetrating, surface ionization that may contribute to cytotoxicity at certain output levels requiring EPA monitoring.

THE PROBLEM: According to Rima Laibow, MD, protein structure in living, healthy tissue is always in a state of alignment. This is not evident in the connective tissue that holds the body together where the alignment of collagen fibers is stable. However, protein structures break down as cells die or are damaged. These waste proteins are easily removed by a healthy, functioning lymph system. But when the lymph system has become congested or clogged and can no longer effectively flush out wastes, these useless proteins become trapped in the interstitium (the area between the living cells in connective tissue).

These nonfunctional proteins have the same electrical properties of attraction as functioning proteins, though as they organize, their structures are completely random and characterized by instability. This is called “fibrotic condition of the interstium.” The instability of these non-functional proteins causes them to attract water and hold it via electrical bonding, resulting in swelling and further congestion. This is edema. Now, with a clogged lymphatic system continuing to fill with waste proteins and other toxins and as organs losing their ability to remove wastes through the lymph system, many kinds of pathologies occur in the body.

THE SOLUTION: Using extremely low current, cold-gas light photons, the ST8 creates a beneficial photon-field environment around the cell in which the cell can correct its electromagnetic charge. No longer characterized by instability as the cell’s field is now balanced, these non-functioning proteins separate from their pooling, random structures and release the collection of water they were holding, restoring natural lymph fluidity and greatly enhancing the delivery of waste material to the organs and nodes responsible for waste elimination.

Healthy tissue protein structures do not attract water as they are already in balance, and because they are already in balance, they ignore the energy the ST8 presents. With these random protein structures broken up and released from their bonds to water, the tissue has returned to a state of free-flow, the ideal condition for effectively treating swollen tissue.

THE ENERGETIC LEVEL: The ST8, because it is working with the quantum scalar, takes the super-oxygenated oxygen’s “energy signature” and delivers that energetic signature directly to the targeted area...directly to the affected cells, which will choose whether to accept or reject the ST8's incoming frequencies. Cells are selective and will naturally only choose the vibratory rate required to put themselves back into alignment. As we’ve said before in other newsletters, when you give the body what it needs, it knows to correct itself.

Since the super-oxygenated oxygen is transmitted to the cell at the quantum energetic level through the field rather than through the body at a material level, side-effects are non-existent or rare if the person is pooping, peeing and hydrated. Like a homeopathic remedy, which also uses the energetic signature of a material rather than the material itself (though unlike a homeopath, the ST8 applies that energy directly to the affected site), there is a cause and effect benefit without the introduction of physical material. No destructive free radicals can be created, as there is no physical material available to help create them...only an energetic signature of the physical material is present.

OXYGENATED TISSUE: The ST8 was created using the Max Planck Institute’s (Germany) premise of injecting ozone into tumors of critical care patients. When ozone was injected, the tumor turned to mush. The disease was devitalized, as it could not live in any oxygenated environment. Using this principal, researchers took the idea of injecting ozone into the body and combined it with quantum scalar technology, thus energetically carrying the oxygen’s information to the field and body and presenting it at the cellular level. With the ST8, the energetic signature of the super-oxygenated oxygen is introduced at an energetic level so cells have the opportunity to turn to a normal, healthy state...armed with the right energetic information to bolster the immune system.

When coupling good medicine and super-oxygenated oxygen to support tissue detoxification, the body has a grand opportunity to recover from-and prevent-many serious illnesses. Applied evidence supports the fact that extreme metabolic stagnation commences to disassociate upon presentation of the energy produced by the ST8 with no adverse side effects.

Dr. Dean Silver, in the summer of 2001, discovered he was suffering from T-Cell Lymphoma and “loaded with toxins and lead and mercury and insecticides.” In summer 2002, after foregoing chemotherapy and biopsies in favor

of a program “religiously” using the ST8 in conjunction with dietary changes, immune enhancers, enzymes and other modalities, Dr. Silver had “no more lymphoma signals.”

“My energy level picked up; I got the mercury out, I got the lead out. . .Immune function was sky high, killer cell function was sky high; felt pretty good. . .I’m clean now.”

At the Sixth Annual International Conference of Bi-Energetic Medicine, Dr. Silver called the ST8 “groundbreaking science” and said, “the way I see this is, I don’t think antioxidants did this. I don’t think medications and enzymes did it. I really think this machine did it...I really think this is the way to go to get toxins out of people...and I think a lot of us are just missing the boat...How did my lymph nodes clear up in a year? I think the ST8 really works.”

With the thousand of chemicals and heavy metals we breathe in every day, not to mention the xenoestrogens that we inhale every time we’re in traffic behind a bus or truck, we need all the help we can get to detox. We offer special discounts on prepaqs.

We are located in Arnold, Maryland. Office hours by appointment.

For further information, or to schedule an appointment, call Alexis Rotella at (410) 384-9183.

Alexis K. Rotella, Ph.D., M.Ac., L.Ac., Dipl.(NCCA), CNC

Licensed Acupuncturist (M.Ac., L.Ac., Dipl. (NCCA)
Certified SCIO/QXCI/Bioresonance Practitioner
Certified Nutritional Consultant (CNC)
Certified Quantum Reflex Analysis Practitioner
Certified in Homotoxicology (Westbrook University)

Author, “How Words and Thoughts Affect Your Body”*
