

WHAT IS QRA (QUANTUM REFLEX ANALYSIS)?

QRA is a one-of-a-kind, effective modality which tests the bio-energetic status of the body's key organs and glands using a university-proven muscle testing technique of medically accepted reflex points. During a session, I test these key points on the body's surface to determine how they're doing. We either get a strong or weak read.

HOW CAN QRA HELP YOU?

I can quickly pinpoint problem areas and determine the nutrients that are needed in the amounts needed in order to rapidly restore the ideal cellular resonance of that particular organ or gland.

WHAT IS AN INTERFERENCE FIELD?

An Interference Field (IF) is an area of the body that has been previously traumatized either from an old scar, whiplash or accident. Even though a trauma may have occurred years ago and is no longer noticeable, it can still act like a powerful short circuit that blocks the body's natural energy flow to a specific organ or gland. Here are just two examples:

An 18-year old student received a whiplash injury when he was 13. The trauma in the neck reflexed to his liver creating chronic sinusitis. When the Interference Fields were cleared, his sinus problems cleared.

A fifty-year old man sprained his ankle at age 40. The sprain reflexed to his heart area causing heart palpitations. When the interference fields were eliminated, his heart problems also healed.

DO YOU HAVE HIDDEN INTERFERENCE FIELDS?

It's the rare person who doesn't. Interference Fields are quite common and are seldom considered in most practitioner evaluations. It is not unusual to find that the root cause of many health issues is due to hidden Interference Fields. QRA can swiftly identify them and eliminate them so the cause of the illness can be cleared away in order to allow the body to heal. Take the example of a hose with a kink. The water can't flow through the hose unless the kink (or interference) has been fixed. Interference Fields can cause a cascade of problems.

THIMBLE OR WHEEL BARROWFUL OF SUPPLEMENTS?

Founder of QRA, Dr. Bob Marshall, states: "Once your active Interference Fields are

eliminated, a thimble full of nutritional supplements can now deliver what a wheelbarrow full previously could not. Once the ‘short circuits’ in your biofield have been erased through QRA, the body can return to its ideal cellular resonance and most ideal health.”

YOU ARE ALREADY TAKING A BARRELFUL OF SUPPLEMENTS. WHY SHOULD YOU TAKE THE ONES I PRESCRIBE?

Most supplements, believe it or not, test toxic. Premier Research Lab products are excipient free. They contain no toxic tagalongs like magnesium stearate, fillers, or dyes.

Over time, those things can destroy the DNA. Chances are the products you bring in your many shopping bags will not be utilized by your body. Our testing can prove it to you. My patients are pleasantly surprised when they start on our pure natural supplements. Never before had they seen a difference in their energy.

Dr. Marshall has invested in rare, state-of-the-art equipment that tests every product that is sent to his lab. Whatever tests toxic is immediately sent back to the manufacturer. Dr. Marshall uses only herbs and products from parts of the world that are free of pollutants. This also applies to cosmetics and supplies that we use in cleaning. After meeting and studying with Dr. Marshall, my life started to change. I stopped coloring my hair after discovering that the “natural” products that I bought in the health-food store contained toxins which then traveled to the brain and blood stream. All of the shampoos and facial products I had been using and spending hundreds of dollars on tested toxic. There’s a lot of hype out there and competition and rationalization why one company’s products are better than the next. Most of them are not good for us. Instead of lamenting the thousands of dollars that we threw away, it’s best to move on and open up to a cleaner, healthier way of living. The best place to be is in a state of unknowing. I can’t teach a patient who thinks they know more than I do. An open mind is required in order to see changes in our health although I do understand why patients who’ve been through the health-care circuit are not trusting and disillusioned. I’ve been there myself.

YOUR BODY DOES KNOW WHAT IT WANTS

The body is a self-healing machine and it can heal itself when you give it what it needs. If you’ve been sick for years and you’re still not well, it’s a sure bet that what you’re doing is not what your body needs. Sometimes just eliminating Interference Fields can change a person’s life. Sometimes addressing geopathic stress and emotional blocks are the keys

QRA ALSO ADDRESSES DENTAL ISSUES

Did you know that a tooth infection can prevent you from getting well? A tooth infection can not be overcome on its own. The infection (or cavitation) needs to be cleared. Biological dentists who are familiar with cavitations will often inject the site with novocaine, then inject a homeopathic substance into the area. They don't realize that the injections are causing scar tissue and may be creating a new Interference Field. We get great results using dental clay to clear cavitations. It's a lot cheaper way to go and quite effective. Did you know an infection or problem with one of your front teeth can cause a problem in your gonads or prostate? People who try everything to get well usually don't have a clue that the problem is coming from their mouth.

I had a patient several months ago who had a tooth infection that was causing breast problems. Once the cavitation was cleared with clay, her breast swelled for a few days until the infection cleared.

I work with entire families. Invest in yourself. Embark on a new learning experience – an open mind opens new doors that can enhance the quality of your one precious life.

I offer a free 15-minute phone consultation. Call for your appointment today.
